Don’t miss your chance to land this opportunity!

Many contracting and subcontracting opportunities will be created by the planned construction of the Silver Parking Ramp at Terminal 1-Lindbergh at the Minneapolis-St. Paul International Airport.

Agenda

The event will begin with a one-hour presentation by Metropolitan Airports Commission (MAC) staff and their consultant team, covering the following topics:

▲ Overview of the project, project elements, and construction timeline
▲ The state’s Targeted Group Businesses (TGB) program, which encourages certified TGB small business participation in public infrastructure projects
▲ The MAC bidding process

The presentation will be followed by a 90-minute mixer where attendees can meet members of the project design and engineering staff, potential prime contractors, and other contractors.

Attend this free informational event to learn about contracting opportunities in:

» Parking structure construction
» Building construction
» Demolition
» Excavation
» Specialty construction
» Fabrication opportunities
» Specialty equipment
» And more!

Project Overview: MSP Terminal 1-Lindbergh Silver Ramp Parking Expansion Project

The Metropolitan Airports Commission will be constructing a new 5,000-space parking structure at Terminal 1-Lindbergh at the Minneapolis-St. Paul International Airport. The structure will accommodate growth in airport operations and a continued increase in public parking demand. The bid package for the parking structure, which will include demolition of portions of existing infrastructure, construction of an eleven level parking structure, a rental car customer service building, a transit center, and construction of other supporting infrastructure, is expected to be bid in July 2017, with substantial completion in 2019.

The parking structure bid package has an estimated construction cost of $235 million. This project will be constructed at the same time as the new hotel at Terminal 1-Lindbergh, requiring close coordination with the hotel contractor as well as all other project stakeholders, MAC staff, and airport operations.
