DESCRIPTION OF WORK/PROPOSED WORK HOURS:

GENERAL INFORMATION:

The MAC Utility Permit Procedure is required before a tenant or contractor may commence any project on property owned by the Metropolitan Airports Commission. If all conditions of the permit are met, the Permit and Inspections Department will authorize the project. Work shall not begin without receipt of a signed permit. If the project is on the Air Operations Area (AOA), the contractor prior to commencement of any work must make proper security and access arrangements. The signed permit shall be maintained at the job site at all times. A drawing (Map) showing the proposed work area must be submitted with the permit application.

SPECIAL CONDITIONS:

If the job site is within the AOA, the contractor shall exercise special care at all times. Additionally, specific conditions must be met:

Security

All workers on the secured AOA must be under the supervision of either a properly badged foreman; a badged tenant employee or a badged MAC employee at all times. Security badges will be issued on the basis of length of project.

If scheduled work will be seven (7) calendar days or longer, a permanent security badge will be required of at least one on-site employee. Sections I and 2 of the security forms(s) must be completed and a \$200.00 deposit (each) and a \$10.00 processing fee (each) will be required. The \$200.00 deposit will be refunded upon return of each badge to the Airport Police Department (APD). Permanent badges are issued at the Airport Police Badging Office, Terminal Building, baggage level, Door #1. The phone number is 612-726-5141. NOTE: APD security training may be required.

If scheduled work will be less than seven (7) days, temporary security badges will be required for all on-site employees. Sections 1 and 2 of the security form must be completed for all employees.

If security escorts are provided by MAC personnel, there will be a charge of \$40.00 per hour, payable at the conclusion of the work. If escorted by MAC personnel, no security badges will be required for contractor personnel.

Communication And Vehicles:

Communications via radio or cellular phone will be maintained between the contractor and MAC Operations at all times while the contractor is on the AOA. MAC Operations shall be advised when starting and ending work each day, and when the entire project is complete. Company logos and amber flashers will be required on all construction vehicles operating within the AOA.

Construction within aircraft movement safety areas will require special coordination. Construction within runway safety areas shall normally be limited to the hours between 11:00 p.m. and 6:00 a.m.

Unless a dedicated haul route is established by MAC, all construction personnel will be escorted to and from the job site by MAC personnel. When suspending work for the day or for other reasons, the contractor shall remove all personnel, equipment and uninstalled materials except items specifically approved by MAC. The contractor shall sweep and clean immediately all debris caused by construction activities. Work may be suspended by MAC without advance notice due to weather, air traffic or emergency conditions.

In case of emergency, dial 911, or call MAC Police/Fire Dispatch at 612-726-5577.

GUARANTEE DEPOSIT:

The contractor shall restore the affected work area to its original condition or better. A \$100.00 deposit may be required which shall be held subject to satisfactory restoration and final inspection of the job site by MAC personnel. If indicated, the deposit must accompany this application.

Note: If project includes excavation, the applicant is responsible for calling Gopher State One Call @ 651-454-0002 Or 800-252-1166.

I have read and agree to comply with these conditions.
