JAZB Purpose & Role

- The Minnesota State Legislature revised its zoning statute in 2019.
- The MAC completed improvements at the airport in 2020, which:
 - Lengthened the main runway
 - Converted the parallel runway to a parallel taxiway
 - Shortened the turf runway

JAZB Purpose & Role

- <u>Purpose</u>: Through a collaborative process, the JAZB seeks to develop an airport zoning ordinance that achieves a reasonable level of safety while considering compatible community development and the social and economic costs of restricting land uses.
- <u>Role:</u> The JAZB considers the requirements of Minnesota Statutes in developing airport zoning regulations, provides opportunity for public input, submits the proposed regulations to MnDOT for approval, adopts the final regulations, and transmits the regulations to affected municipalities for incorporation into local zoning codes.

Selection of Chairperson

- JAZB membership requirements are established by Minnesota Statute, section 360.063
 - "A joint board shall have as members two representatives appointed by the [MAC] and two from the county or municipality, or in case more than one county or municipality is involved, two from each county or municipality, in which the airport hazard area is located, and in addition a chair is elected by a majority of the members so appointed. All members shall serve at the pleasure of their respective appointing authority." (Minn. Stat. § 360.063, subd. 3(b).)
- The Chair must be someone "in addition" to the Board
 - The Chair must be elected by a majority of the Board Members (at least 8 members), i.e., not a majority of the quorum or a lesser number.
 - If a voting JAZB member appointed by a municipality or the MAC is selected as chairperson, the municipality or MAC must formally appoint a new voting member.
 - No other criteria are stated.

Goals for the Crystal Airport JAZB

- Develop an Airport Zoning Ordinance for review and approval by the MnDOT Commissioner of Transportation
- Seek to develop an Airport Zoning Ordinance that achieves a reasonable level of safety while allowing for compatible community use and development
- Ensure that the Airport Zoning Ordinance is developed in a manner that includes meaningful stakeholder engagement

Elements of an Airport Zoning Ordinance

- Two separate elements
 - Land use restrictions
 - Structure/object height restrictions
- Existing Safety Zones A, B, and C were adopted by the JAZB in 1983.
- Under the 1983 ordinance:
 - Land uses are restricted out to 6,200 feet from each runway end (extent of Safety Zone C).
 - Numerous residential lots are exempted from land use zoning restrictions as "Existing Residential Neighborhoods".

Elements of an Airport Zoning Ordinance

- Structure/object height zoning restrictions are typically based on Federal Aviation Regulations (FAR) Part 77 airspace surfaces.
- Under the 1983 ordinance, airspace obstruction zoning restrictions apply:
 - Up to 1 ½ miles beyond the perimeter of Airport boundary, and
 - In the approach zone up to 10,200 feet beyond the perimeter of the Airport boundary.
