

# Our Commitment to Sustainability

## | 2030 Sustainability Goals

Building on its longstanding commitment to sustainability, the MAC has formalized goals to reach by 2030. The MAC is committed to

reducing MSP greenhouse gas emissions by 80%

reducing MSP water usage per passenger by 15%

diverting 75% of MSP's waste from landfill

engaging employees in sustainability.

- The MAC has a robust internal structure to facilitate, guide, and support innovation toward the achievement of its 2030 sustainability goals. In addition to an active executive leadership committee, the MAC has dedicated working groups for water, waste, and emissions that exist to develop roadmaps, action plans, and strategies to advance our commitments.
- The MAC is recognized by the Airport Carbon Accreditation program for its carbon emissions reduction efforts at MSP.
- The MAC actively participates in Airports Council International-North America's sustainability working groups as well as the Minnesota Sustainable Growth Coalition.

## | Stats & Stories

- In 2021, MSP restrooms saved 13 million gallons of water, enough to fill 19 Olympic-sized pools.
- In 2021, MSP's solar panels generated enough electricity to power 577 homes for a full year.
- The MAC collaborates with its airline partners to further advance MSP's sustainability commitments. For example, we have supported the transition to electric ground support equipment and extended our recycling and composting programs into the airline lounges.

- All MSP restaurants participate in the MAC's recycling and composting programs. When possible, MSP restaurants recover food for donation, and in 2021, 20 tons of food were donated, equal to 33,000 meals.

## | About the MAC

The Metropolitan Airports Commission (MAC) owns and operates Minneapolis-St. Paul International Airport (MSP) and six general aviation airports in the greater Minneapolis-St. Paul metro area that together makes up one of the largest and most respected aviation systems in the nation.
